

Zinko Jack Stands

Models: ZHS Series, ZHP Series, ZJS Series

Capacity: 0.75 to 12 ton

Usage

Designed to support and stabilize vehicle components while vehicle is in a raised position. All stands are sold in pairs and have a rated capacity.

Special Features

Tripod Type Stands (ZHP Series)

1. Pin positions provide four different height adjustments.
2. Acme screw allows for 8" of exact height adjustment.
3. Quick adjust spin handle provides ease of turning under load.
4. 23" tripod base designed to aid stability.
5. Stands are not designed or intended to support vehicles. Use four stands when stabilizing vehicles on an automotive lift.

Slim Type Stands (ZHS Series)

1. Lightweight, slim design makes handling easy in tight work spaces.
2. Acme screw allows for precise height adjustment.
3. Quick adjust spin handle provides easy turning under load.
4. Foot pedal folds for convenience (ZHS-075P).

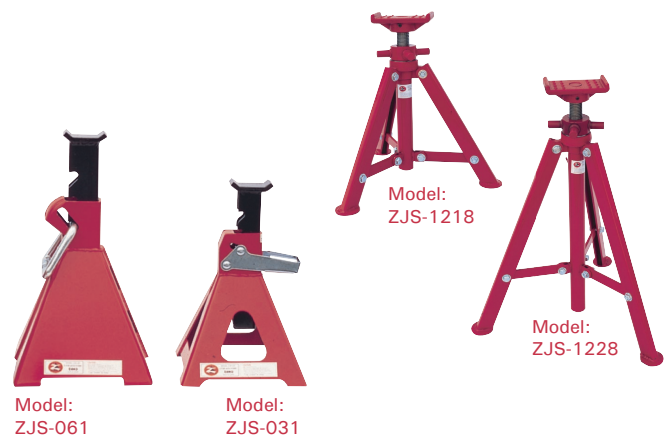

Model Number	Capacity (Tons)	Dimensions (in)				Ship Weight (lbs)
		Minimum Height	Maximum Height	Screw Range	Base Area	
ZHS-075	0.75	53 3/8	80	26 5/8	12 (dia)	68/PR
ZHS-075P	0.75	53 3/8	80	26 5/8	12 (dia)	76/PR
ZHS-150	1.5	48 7/8	85 3/8	36 1/2	23 (side)	80/PR

Screw Type Stands

1. Minor adjustments can be made with no lift required.
2. Formed steel welded base and frame for extra strength.
3. Easy operation type column adjusts to fit any height position.
4. Extension screw locking device for extra safety and support.
5. Large support saddles and handle for easy adjustments.

Ratchet Type Stands

1. Welded steel base for extra strength.
2. Positive lock handle can not be released under load.
3. Saddle column provides self-locking ratchet height adjustment.

Model Number	Capacity (Tons)	Dimensions (in)				Ship Weight (lbs)
